

# 4-H Embryology Summer Fun

A COOPERATIVE VIRTUAL LEARNING EXPERIENCE FROM THE PRESTAGE DEPARTMENT OF POULTRY SCIENCE, CHATHAM COUNTY 4-H AND THE LIVESTOCK CONSERVANCY

FREE

If you're interested in learning more about poultry and the incubation process, then please join us for this year's 4-H Embryology Summer Fun program!

Over a four-week period, youth will have the opportunity to walk through the Experiments in Poultry Science 4-H curriculum.

While it's not necessary to incubate eggs for this program, up to fifty youth can secure an incubator and hatching eggs in order to have a more hands-on experience.

**PLEASE NOTE:** Incubating eggs requires turning the eggs at least three times a day for 18 days. Please take these requirements into consideration before selecting this option. Incubators will be returned at the end of the program.

To register, please visit: <https://4-hembryologysummerfun.eventbrite.com>

If you are unable to register online, please contact Victoria Brewer, Chatham County 4-H Extension Agent, at 919.545.8303.
